

Hello, my Name is Steve Sacco, my wife Michele and I have been lake site owners since 2017. We have 3 kids Joel, Brayden, and Amelia. Michele and I live in Cheektowaga NY.

I am running for a position on the board at Faun Lake as I want to be a part of building back our wonderful community. In my time at the lake, I have come to understand a large amount of the Lake and its people. I see a lot of new members joining our wonderful community and a good number of younger faces. I see these younger faces as the Lakes future, I would like to be a part of making our park better so that our future leaders can continue in our steps and have the lake continue as it has been now and into the far future!

Professionally I am a licensed NYS independent appraiser in the automotive industry. Since 1996 I have been in the collision field. I started at the bottom as an entry level detailer and have pursued each role along the way. I have been a Body Technician, a Paint technician, a Frame technician I grew in all those roles and saw how the industry was changing and decided to get into the business end of the industry so that I could help the guys in my current roles. From technician status I entered myself into production roles and learned to organize and move vehicles and people to streamline the business and turn out a great product while making my employees more money. From my production role I led myself into the estimating roles and took the required steps with New York to earn my license to write estimates. It has been roughly 15 years and I still have my license in the field. With all my experience and now license I moved up into store management and even general management roles. I have run high production collision shops in the buffalo area including Jim Doyle Ford, Auto Collision & Glass, Carubba Collision, Gerber Collision and Currently Gabes Collision. I have a strong moral and work ethic and focus on organization and streamline process, I believe this will be helpful in our park.

Nonprofessionally I am a jack of all trades, master of none. I have great mechanical ability and have done all my own building and construction needs at my home and at the Lake. I have helped many friends and family in their projects as well. My general experience in things such as small electrical, plumbing and building will be helpful with portions of lake function as well. Currently I serve as a Tour committee volunteer and on the Architectural committee as a volunteer at the Lake.

My mission for the Lake present and future is to do whatever I can to help and assist our community for the greater good. In seeing what our current board is doing to make our place better, I would like to help continue this mission so that our owners feel safe and can enjoy everything that is Faun Lake.

Thank you

Steven J Sacco
